

President Destler Uses Cyberportal To Talk Across Campus

July 31, 2007 President William Destler and Dr. Rebecca Johnson speak with Director Mark Fairchild of the Munsell Color Science Lab via CyberPortals connecting Buildings 76 and 18 while visiting the Center for Imaging Science. College of Science Dean Ian Gatley and Center Director Stefi Baum joined in the discussion.

These stills taken from medium quality video streams during the chat show what each participant saw during the exchange. They were able to view each other via real-time DV quality video streams as part of the Access Grid collaboration environment system, a project of the ICE Lab (<http://www.rit.edu/~rc/ice.html>).

Technical note: the live streams were uncompressed DV streams at standard definition (720x480@30fps) traveling over 1 Gigabit networks.

Erin Fredricks, Stacy Casella, Dave Wyble, & Mitch Rosen look on at the Color Science Lab
